

The Independent Liquor and Gaming Authority (ILGA, the Authority) is established by statute to facilitate the balanced development of the hospitality industry while minimising the risks of harms associated with gaming machines and liquor consumption.

Fulfilment of legislative mandate

ILGA's mandate is established by legislation. Our decision-making processes promote independence, integrity and transparency. Our decisions will be communicated in a timely way and our performance reported monthly.

Stakeholder Relationships

Leverage strong stakeholder relationships and excellent communication to convey a clear understanding of ILGA's legislated role, balancing the diverse interests and expectations of Government, Industry, and the Community across NSW in its decisions.

Evidence to support decision making

ILGA will make best use of the evidence and data available to support decision making together with ongoing work to help ensure that those decisions are clearly and promptly communicated.

Sustainable funding

ILGA resources and performs its functions in accordance with its budget and consistently with accountability frameworks.

Workforce management and Digital Transformation

Agile resource management and investment in digital transformation including the effective and safe use of Artificial Intelligence enables ILGA's efficient operations.
